PETRUS

TOWER SPECS:

The tower is modeled after the 60-year-old wooden casks that hold approximately 6,000 gallons of Petrus Aged Pale beer and originally held white wine and then calvados.

This custom made tower is made to order by a former American Micro Brewer exclusively for Global Beer Network. The tower comes with two faucets with built in lines, and two insulated glycol lines. The tower can be installed by bolting it to the bar. There are 4 anchor points for the bolts.

A unique feature of this tower is a hidden compartment with a door that unlocks with a key. Easy to hide giveaway promotional materials for special events as Petrus is the "Key to Heaven."

Brouwerij Bavik produces 7 different Petrus beers including the seasonal Petrus Winter 9 for the holidays. Plus Global Beer Network has a full line-up of 60 additional draft beers that you can pour out of the tower.
